

Int Section

As the year draws to a close it is time to reflect upon the fun and excitement we've had during this most eventful year.

To start with as soon as we got back from BRL, it was straight into the preparation for Skippy92 which everyone must agree was a HUGE exercise. The exercise was basically set around the excitement capital of the Northern Territory "PINE CREEK". A nice place to visit but I would hate to live there.

The next thing you know its tools down for Easter stand down, which meant a change for everyone. At this point in time we lost CPL Palmer and then newly promoted CPL Monty, but we gained LCPL Secis.

From there the year started to kick in, I mean with the two island states of Lusaka and Limpopo playing up, we were pretty well flat strap. With our efforts on the maps of

Lusaka and our outstanding mud models of Limpopo we were really cruising along when disaster struck, we were told that we weren't needed. So we missed out on a trip to the island of Limpopo, maybe next time.

After that it was all down hill to September stand down, what a relief it was to be on holidays.

Now that the holidays are over its a down hill run to Christmas and BRL, there is going to be whole-sale changes in the hierarchy in Int Section.

First of all the IO is going on 12 months leave without pay and SGT Mills will be on his way to 31 RQR but that's after he finishes his stint up at Tully as a DS for SUB 2.

All in all its been a pretty hectic year and with next year looking pretty much the same, here's looking at you and hoping you all have a great Christmas BRL.

The IO and his men rest after a hard weights session!
